DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim, as amended, now requires a cut face and four rectangular faces, then refers to "the face" in line 16, thus it is unclear as to what "face" this refers and therefore there is a lack of proper antecedent.

Also, it is unclear as to what is meant by "a square flat cut free" added to the claim. Should this be "face"?

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is finally rejected under 35 U.S.C. 103(a) as being unpatentable over Parsons and Rocca.

Parsons shows the claimed invention except for the use of a bevel on the inner portion and the specific size proportions. Rocca suggests that a driver can have such a bevel at any point. It would therefore be obvious to one skilled in the art at

Art Unit: 3723

the time the invention was made to modify Parsons by using a bevel because Rocca suggests the use of such a bevel.

Conversely, it would be obvious to modify Rocca by using a square cross section instead of a hex as Parsons suggests the shape to be well known and Rocca states that any well known shape can be used.

Further, to size any tool or part thereof to fit a desired need is an obvious modification to one skilled in the art.

Response to Arguments

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Both references clearly show that a driver can have an inner and outer working end that can engage within corresponding recesses in a fastener and that the shape can be any well known shape, e.g. square, hex, octagonal, etc.. Further, the end of the bit can be made flat, as clearly shown by both references to engage with a corresponding flat surface in the fastener.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3723

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
